Executive Summary

What is HELP U HIRE Solutions?

HELP U HIRE Solutions is the developer of FASTool, an inexpensive and easy to use front end to your Internet hiring process.

What are the Problems Facing Hiring Managers?

A major challenge is "resume overload" - having to deal with hundreds of applicants for each job opening. To determine who to interview, you need to spend a lot of time reading each applicant's resume and cover letter. Added to the frustrations, many unqualified applicants waste your time by applying to your opening.

Why use the FASTool?

FASTool uses an on-line questionnaire to draw information from applicants on how they meet *your* requirements, and emails this information to you. This allows you to only spend time looking at the qualified ones.

Everything is done to allow you to quickly know if the applicant is worth looking at. We place a short summary of their key skills and experiences in the subject line, so you can quickly understand their background. The body of the email contains a detailed summary, so you can get a better feel without having to open the applicant's resume.

What are the Costs?

o Low price of $199 for a regular applicant prescreen.

o FASTool is a web-based service, so there are no additional costs for hardware, software, installation, maintenance, etc.

o We develop the questions and host the questionnaire, so it is quick and easy for you to set up and use.

Visit http://www.helpUhire.com for information on how to stop being afraid of posting your job openings.

FASTool Key Features

- Automatically flags applicants who don't meet your requirements (often over 50% of applicants)

- Summarizes applicant's skills and experiences in an easy to read format

- Assigns candidates a numerical score, allowing you to rank candidates

- Web based service, so you don't need to buy any hardware or software

- You contact info is hidden, so applicants (or spammers) can not contact you

- Works with job boards, online classifieds, your corporate web site, etc.

- Costs less than the cost of a job posting on Monster or HotJobs!
